

“Serving the Public Thirst”

Rules and Regulations

P.O. Box 427

9203 St. Rt. 136

West Union, OH 45693

Office: 937-544-2396 or 1-800-288- 0039

Retail- Meter sizes range from 5/8" to 2" and can include businesses and other high volume users. This class must sign the corresponding water user's agreement. Mobile home courts and cabins however, must sign a contract.

Commercial- Meter sizes range from 3" to 6". This class must sign a commercial water user's agreement.

Wholesale- This class is for reseller's of water and must be done by contract. All rates and tap fees are established by the Board of Trustees and are subject to change without notice.

Easements

Before any new construction can take place on private land, an easement must be granted by the landowner. The District will not pay for any easement other than the dollar stated on the easement when extending to serve new customers.

No property owner who has refused to grant an easement for the location of water lines or meters on their property, thereby necessitating the construction of such lines in the public right-of-way adjacent to such property or force the line to be installed on the opposite side of the road, shall be granted a water tap or service to such property except on specific resolution of the Board of Trustees of Adams County Regional Water District.

In considering such application for water service the Board shall require a written request therefore including the applicants' explanation of his/her reasons for refusal to grant such easements. The Board may require staff input on such application.

The Board, if such application for water is granted, may require:

- A. Granting of the easements as outlined by company staff as necessary to service the property in question.
- B. Payment by the applicant of any amount to the District, in addition to normal tap fees, line cost, bores, and other construction cost as designated by the Board to insure adequate resources for relocation of the water line from public right of way if such relocation is required by governmental agencies, either state, county or township.

For purposes of this policy the relocation charge shall be at the cost of time and material at the given time for the frontage of the property in question, or the length of line needed to circumvent a property where the easement was refused.

This policy shall not apply to bona fide third party purchasers of property on which an easement was refused if such party did not personally participate in the refusal to grant the easement for construction of the water line, either at this location or prior location owned by the third party.

This procedure shall also apply to the circumstances where a property owner requests Adams County Regional Water District to release an easement in order to dedicate such property to the public agency as additional right of way of adjacent roads. Adams County Regional Water District shall not release such easements until the applicant has paid the relocation sums required.

ADAMS COUNTY REGIONAL WATER DISTRICT
RULES AND REGULATIONS

I. SERVICE CLASSIFICATION.

There shall be no distinction in this category. When the word "District" is used in these rules, it refers and applies to the Adams County Regional Water District, and the words Customer and Consumer shall be synonymous when used in these rules.

II. SERVICE APPLICATION.

A. Any owner of a single family dwelling, auto court, duplex, or multiple dwelling building, a person holding property having reasonable accessibility to the source of, and who is in need of having water supplied to this property, may be a customer of the District. Persons who receive the approval of the Board of Trustees may be a customer of the District by paying the current service tap-in fee along with the signing of a water user's agreement and an acknowledgment and/or easement as provided and required by the District, provided that no person otherwise eligible shall be permitted to obtain water service from the District if the capacity of the water system is exhausted by the needs of its existing customers.

B. All new customers of the District shall make written application and shall be required to state in writing they are the owner of the legal title to the real estate to which water service is requested. All potential customers wishing to purchase a water service tap must provide a copy of the deed to the property or proof of ownership. (Land contracts do not constitute proof of ownership for District purposes until clear title of property is issued to prospective customer). The respective owner or owners shall agree, upon making the water application, that they are responsible for the payment in full of water bills owing to the District as long as that particular property is served as a customer of the District.

C. The District may reject any application for water service when the applicant is delinquent in payment of bills incurred for service previously supplied at any location, and any customer who is delinquent in payment of a bill shall automatically forfeit water service until the bill is current.

D. If there is a violation of any of the provisions of these rules, code of regulations, or any other regulations of the District, the District may remove the meter and discontinue service. Where the meter is thereafter reinstalled, the customer shall first pay to the District a fee as set forth by the Board.

E. If the customer voluntarily requests removal of his meter for a definite or indefinite period, there will be an established fee for the removal of the meter and another fee when the meter goes back in service. Before the meter goes back into service, we must verify the type of service line material and verify that the customer's side of the meter has a private shut off valve and check valve in place.

F. Any customer receiving a water tap after October 14, 1999, and who wishes to voluntarily disconnect service, must first have accumulated \$1000.00 in water service payments for that particular service account. Those customers who have not accumulated \$1000.00 in water service payments may not have service voluntarily disconnected or could be charged the difference remaining between the amounts of water service payments received by the District and the \$1000.00 liquidated damages fee as stated in the water user's agreement.

G. The individual or company in whose name the water service/water user's agreement is prepared shall be responsible for payment of all bills incurred in connection with the service rendered. Bills will be sent solely to the owner/owners.

H. All applicants for taps will be required to comply with and follow Adams County Regional Water District's "Rules and Regulations." A customer must notify the District within thirty (30) days where a tap is to be set or it will be set at the discretion of the District as work schedules permit. The District does, however, reserve the right to the final location of the meter setting.

III. INITIAL OR MINIMUM CHARGES.

A. The flat minimum monthly rate, as established in the rate schedule, will be payable irrespective of whether any water is used by the customer during a month.

B. The flat minimum rate, as established in the rate schedule, will be payable irrespective of seasonal use. In the event the District is required to remove the meter, the District, when service is again restored, will make a charge for such reinstallation, as set out in Section II.E herein-above.

C. A tap fee shall be made for each new meter installation where made, regardless of location. Each meter will be a separate account for reading and billing purposes.

D. Water furnished for a given lot or farmstead shall be used on that lot only. Each customer's service must be separately metered at a single delivery and metering point.

E. In addition to the collection of regular rates, the District may collect from the customer a proportionate share of any privilege, sales, or use tax or imposition, based on gross revenues received by the District, and same will be added to the monthly bill.

F. All service charge fees during/after business hours are determined by the Board of Trustees.

IV. DISTRICT'S RESPONSIBILITY.

A. The District will install, maintain, and operate a main distribution line or lines from the source of water supply, and service lines from the main distribution line or lines to the property line of each member of the District at which points, designated as delivery points, meters to be purchased, installed, owned and maintained by the District shall be placed.

When the property is located adjacent to water line, the meter tap is set approximately 6-8 feet from the water line, under normal circumstances. The District will also purchase and install a cut-off valve to be owned and maintained by the District and to be installed on some portion of service line and/or meter owned by the District. The District shall have the sole and exclusive right to use said cut-off valve and to turn it on and off. The District will also install a pigtail allowing the customer to connect. This connection and any line past this connection will be the sole responsibility of the customer.

B. Each customer shall be entitled to not exceed one (1) service line from the District's water system, unless otherwise approved by the Board of Trustees and provided that the customer shall be required to pay the prevailing tap fee for each service line. No new service line or change in an existing service line may be made which will interfere with an existing service line or the delivery of water therein.

C. Each service line shall connect with the District's water system at the nearest available place to the place of desired use by the customer if the District's water system shall be of sufficient capacity to permit delivery of water through a service line at that place without interfering with the delivery of water through a prior service line. If the District's water system shall be inadequate to permit the delivery of water through a service line installed at such place without interfering with the delivery of water through a prior service line, then such service line shall be installed at such place as may be designated by the District. Each customer will be required to dig or have dug a ditch, to purchase and install, and to maintain such portion of the service line or lines from the property line of the customer to his premises at his own expense.

V. DISTRICT'S LIABILITY.

A. The District does not assume the responsibility of inspecting the customer's piping or apparatus and will not be responsible therefore.

B. The District reserves the right to inspect and to refuse service unless the customer's lines or piping are installed in such manner as to prevent cross-connections or backflow, and unless installation is in accordance with all county and state health department regulations.

C. The District reserves the right to relocate a service meter from one location of customer's property to another location on same property for reasons of convenience of the District or for the District's maintenance purposes. Service taps and meters will not be relocated or transferred to a separate property.

D. The District shall not be liable for damage of any kind whatsoever resulting from water or use of water on the customer's premises. The District shall not be responsible for any damages done by or resulting from any defects in piping, fixtures, or appliances on the customer's premises. The District shall not be responsible for negligence of third persons or forces beyond the control of the District resulting in any interruption of service, including, but not limited to, weather conditions, broken or frozen lines, or acts of God.

E. Under normal conditions, the customers will be notified of any interruptions of service, if possible.

F. Adams County Regional Water District cannot, and will not, be responsible for full volume and any specific pressure or an effective continuous supply of water for the normal operation of agricultural use, domestic use, commercial use, fire sprinkler systems, and many other uses utilized by the customers of the distribution system because a continuous supply of water at any given flow or pressure is subject to varying conditions which may affect the operation and maintenance of the mains, services, pumping stations, elevated storage tanks, and other appurtenances of the water system. If the District determines that it will not be able to provide adequate volume and pressure concerning the water furnished to the customer, the District reserves the right to withdraw water service to the customer and refund the tap fee made by the customer. It has been standard procedure that, whenever a tap is installed, a pressure reducer is installed at company expense if the pressure is 100 pounds or more at the meter. Anything less than 100 pounds is the customer's responsibility.

VI. MEMBER'S RESPONSIBILITY.

A. Piping on the premises of the customer must be so installed that the connections are conveniently located with respect to District lines and mains. Before the meter goes into service we must verify the type of service line material and verify that the customer's side of the meter has a private shut off valve and check valve in place.

B. If the District is called upon to provide additional meters, each place of metering will be considered as a separate and individual account.

C. The customer shall provide a place of metering which is unobstructed and accessible at all times. If the meter is not accessible to the meter reader, a letter shall be sent to the customer requesting the problem be corrected before the meter is due to be read the following month. If the problem is not corrected by this time, resulting in a service call by the District to try to obtain a reading or to correct the problem, a service charge shall be billed to the customer.

D. The customer shall furnish and maintain a private shutoff valve and check valve on the customer's side of the meter at the end of pigtail left at installation (see diagram). The District is to provide a like valve on the District's side of such meter or at the meter itself. Any service call requested by the customer's own maintenance problem will entail a call-out fee as established by the Board.

E. The customer's piping and apparatus shall be installed and maintained by the customer at the customer's expense in a safe and efficient manner and in accordance with the District's rules and regulations and in full compliance with sanitary regulations of the state and county boards of health.

F. The customer shall guarantee proper protection for the District's property placed on the customer's premises and shall permit access to it only by authorized representatives of the District.

G. In the event that any loss or damage to the property of the District or any accident or injury to persons on property is caused by, or results from the negligence or wrongful act of the customer, his agent or employees, the cost of the necessary repairs or replacements shall be paid by the customer to the District and liability otherwise resulting shall be assumed by the customer.

H. The amount of such loss or damage or the cost of repairs shall be billed to the customer, and, if not paid, service may be discontinued by the District

I. Water furnished by the District for residential use shall be used for domestic consumption by the customer, members of his household, and employees only. The customer shall not sell water to any other person or permit any other person to use said water. Water shall not be used for irrigation, fire protection, and other purposes, except that when water is available in sufficient quantity without interfering with the regular domestic consumption, then the water may be used for other purposes. Disregard for this rule shall be sufficient cause for refusal or discontinuance of service.

J. All double units or more, such as but not limited to, two houses, a house and a mobile home, a house and an apartment, two apartments, and the like, being served by one meter, shall be strictly prohibited after March 9, 1995. Any such double units existing prior to March 9, 1995 will be "grandfathered" and allowed to continue as to the owner of record on or before said date. Upon the transfer (whether by sale, inheritance, gift, or otherwise) of such property upon which a "grandfathered" double unit exists, the new owner shall install separate meters for each unit as required in the Adams County Regional Water District's "Rules and Regulations." The transferor, or seller, shall have the sole responsibility of notifying the future owner or transferee of such property that such property is in violation of the rules and regulations of Adams County Regional Water District and that the transferee or new owner will be required to install separate meters.

Each such "grandfathered" double units or more, as well as current property owners, must still meet the following requirements.

- 1) Each property owner will be required to have a new inspection to assure the District that the line from the meter vault to first unit is an uninterrupted flow, as required under Section 3745-95-04 (A) of the Ohio Administrative Code; Ohio EPA.
- 2) Each property owner will further be required to have three (3) valves in place; a ball valve, dual check valve, and a pressure reducing valve, if necessary. (see diagram in back)
- 3) If the line from the meter vault has been split between more than one unit, each unit will be required to install the valve set forth in 2 above.

VII. EXTENSIONS TO MAINS AND SERVICES.

A. The Adams County Regional Water District may supply temporary service, for purposes of construction/utility projects requiring water service for a period of approximately one year or less, provided that the District has available in excess of the District's regular needs, and provided the District has available material and equipment necessary to supply said service. Each applicant for such service must pay in advance to the District the District's estimate of cost of labor and materials for installing and cost of removing such service. The District may construct extensions to its water lines to points within its area, but the District shall not be required to make such installations unless the customer pays to the District the entire cost of installation and removal.

B. Potential customers can contact the business office for information on current line extension procedures and options.

VIII. ACCESS TO PREMISES

A. Duly authorized agents of the District shall have access, at all reasonable times, to the land and buildings of the customer for the purpose of installing or removing District property, inspecting piping, reading or testing meters, or for any other purpose in connection with the District's service and facilities.

B.. Each customer shall grant and convey, or shall cause to be granted and conveyed to the District, a permanent easement and right-of-way across any property owned or controlled by the customer, wherever said permanent easement and right-of-way is necessary for the District water facilities and lines, so as to be able to furnish service to its customers.

IX. CHANGE OF OCCUPANCY

A. Not less than one week's notice must be given personally to the District to discontinue service or to change occupancy.

B. The outgoing shall be responsible for all water consumed up to the time of departure, the time specified for departure, or the next scheduled reading date.

C. New owners will be required to execute a water user's agreement and return said agreement to the District within 30 days. Failure to provide an executed water user's agreement will result in a disconnection of service. New owners will also be required to provide proof of ownership by presenting a deed within this 30-day period. Should a deed not be presented, the District will obtain one from the recorder's office and charge the customer an established fee.

X. METER READING - BILLING - COLLECTION.

- A. Meters will be read or estimated and bills rendered monthly, but the District reserves the right to vary the dates or length of period covered, temporarily or permanently, if necessary or desirable.

- B. Bills for water will be figured in accordance with the District's published rate schedule and will be based on the amount consumed or estimated for the period covered. Charges for service commence when the meter vault is installed and connection to the main is made whether water is used or not.

- C. Readings for more than one meter cannot be combined for billing. This includes meters serving the same or different premises.

- D. The NET amount on the bill is payable on or before the due date indicated on the bill. Failure to receive bills or delinquent notices for water service will not relieve the customer from responsibility for prompt payment, as the District **cannot** be responsible for mail delivery.

- E. Payment on bills not received by 4:30 PM on the due date will be charged a 10% penalty. If the 10th due date falls on a Saturday, Sunday, or a holiday, the bill will not be considered late if received on the next working day. This amount becomes delinquent 15 days after due date. A disconnect notice will be mailed to the customer. Failure to receive bills or notices shall not prevent such bills from becoming delinquent or relieve the customer from payment.

- F. Any bill paid by check, which is later not honored and paid by the bank on which it is drawn, will cause the account to become delinquent, and must be paid within eight (8) days with cash, certified check, or money order to insure continuous service. A specified charge, to be determined by the Board of Trustees, will be assessed for a bad check.

- G. After receipt of two checks returned from the bank due to non-sufficient funds, the customer will be placed on a cash-only basis whereas the District will only accept payment by cash, cashier's check, or money order.

- H. Upon water service disconnection for nonpayment, personal checks will not be accepted for reconnection. Customer may pay by cash, cashier's check, or money order to have water service restored.

XI SUSPENSION OF SERVICE

- A. Upon discontinuance of service for nonpayment of bills, the District may proceed to collect the bill in the usual way provided by law for the collection of debts, and may refuse service at this location in the future to any such customer.

- B. Service disconnected for non payment of bills will be restored only after bills are paid in full and a service charge paid for each meter reconnected. Payment must be received by 2:30 P.M. to have meter reconnected on the same day as disconnection. Reconnections **will not** be performed after normal working hours nor on District holidays.

C. If a property owner has multiple accounts and one should become delinquent to the point of disconnection, the District reserves the right to add the delinquent balance to another of the owner's accounts after notification of such.

D. The District reserves the right to discontinue its service without notice for the following additional reasons:

1. To prevent fraud or abuse
2. Consumer's willful disregard of the District's rules.
3. Emergency repairs.
4. Insufficiency of supply due to circumstances beyond the District's control.
5. Legal process or court order.
6. Direction or by order of public authorities.
7. Strike, riot, flood, accident, or any unavoidable cause.

E. The District may, in addition to prosecution by law, permanently refuse service to any customer who tampers with a meter or other measuring device or other District property.

F. Service may be disconnected thirty (30) days after the due date. There shall be a reconnection charge paid, as established by the Board, before any water service shall be reconnected to the delinquent customer, as well as paying all delinquent amounts.

Due to the large geographical area, in order to be fair to all customers, once the monthly meter removal has been started (by removing the first meter); the charge will apply to all delinquent accounts scheduled for disconnection regardless of actual disconnection.

XII. COMPLAINTS - ADJUSTMENTS

A. If the customer believes his bill to be in error, he shall present his claim in writing within 30 days after the receipt of the bill to Adams County Regional Water District, P.O. Box 427, West Union, OH, 45693. Such claim, if made after the bill has become delinquent, shall not be effective in preventing discontinuance of service, as heretofore provided. The customer may pay such bill under protest and said payment shall not prejudice his claim.

B. Meter will be tested at the request of the customer upon payment to the District of a set fee as established by the Board of Trustees. If the seal is broken by other than the District's representative or if the meter fails to register correctly or is stopped for any cause, the customer shall pay an amount estimated from the record of his previous bills and/or other proper data. Should a meter be found faulty resulting in an overread, the customer's water bill will be adjusted and no fee will be charged for testing the meter.

C. An optional leak insurance program for water bills will be offered to the customers for a monthly charge in order to pay water bills for qualifying water leaks. If you should opt out of the leak insurance program no other rate adjustment will be offered.

XIII. ABRIDGEMENT OR MODIFICATION OF RULES.

A. No promise, agreement or representation of any employee of the District shall be binding upon the District except as it shall have been agreed upon in writing, signed and accepted by the acknowledged officers of the District.

B. No modification of rates or any of the rules and regulations shall be made by any agent of the District.

C. The Adams County Regional Water District's Board of Trustees reserves the right to amend these rules and regulations with a majority vote of said Trustees. Any rates or charges specified in these rules and regulations are subject to change at the Board's discretion.

ADAMS COUNTY REGIONAL WATER DISTRICT PUBLIC RECORDS POLICY

It is the policy of Adams County Regional Water that openness leads to a better informed citizenry, which leads to better government and better public policy. It is the policy of ACRWD to strictly adhere to the State's Public Records Act. All exemptions to openness are to be construed in their narrowest sense and any denial of public records in response to a valid request must be accompanied by an explanation, including legal authority, as outlined in the Ohio Revised Code. If the request for public records is in writing, the explanation of denial must also be in writing.

PUBLIC RECORDS

Section 1. Definition

ACRWD, in accordance with the Ohio Revised Code, defines records as including the following: Any document - paper, electronic (including, but not limited to, e-mail), or other format - that is created or received by, or comes under the jurisdiction of a public office that documents the organization, functions, policies, decisions, procedures, operations, or other activities of the business office. All records of the District are public unless they are specifically exempt from disclosure under the Ohio Revised Code.

Section 1.1 Organization and Maintenance

It is the policy of the District that, as required by Ohio law, records will be organized and maintained so that they are readily available for inspection and copying (See Section 4 for the e-mail record policy). Record retention schedules are to be updated regularly and posted prominently.

PUBLIC RECORDS REQUESTS & RESPONSES

Section 2. Evaluation of a Public Records Request

Each request for public records should be evaluated for a response using the following guidelines:

Section 2.1 Identification of Public Records Requested

Although no specific language is required to make a request, the requestor must at least identify the records requested with sufficient clarity to allow District employees to identify, retrieve, and review the records. If it is not clear what records are being sought, the records custodian must contact the requestor for clarification, and should assist the requestor in revising the request by informing the requestor of the manner in which the office keeps its records.

Section 2.2 Method of Public Records Request and Identity of Requestor

The requestor does not have to put a records request in writing, and does not have to provide his or her identity or the intended use of the requested public record. It is the District's general policy that this information is not to be requested.

Section 2.3 Availability of Public Records for Inspection and Production of Copies

Public records are to be available for inspection during regular business hours, with the exception of published holidays. Public records must be made available for inspection promptly. Copies of public records must be made available within a reasonable period of time. "Prompt" and "reasonable" take into account the volume of records requested, the proximity of the location where the records are stored, and the necessity for any legal review of the records requested.

Section 2.4 Time Constraints for Satisfying Public Records Requests

Each request should be evaluated for an estimated length of time required to gather the records. If feasible, routine requests for records should be satisfied immediately. Routine requests include, but are not limited to, meeting minutes (both in draft and final form), budgets, salary information, forms and applications, personnel rosters, etc. If fewer than 20 pages of copies are requested or if the records are readily available in an electronic format that can be e-mailed or downloaded easily, these should be made as quickly as the equipment allows.

All requests for public records must either be satisfied or be acknowledged in writing by a public office within three business days following the office's receipt of the request. If a request will not be satisfied within three business days, the acknowledgement must include at least the following:

A request for clarification (if necessary)

An estimated cost if copies are requested

Section 2.5 Denial of Public Records Requests

Any denial of public records requested must include an explanation, including legal authority. If portions of a record are public and portions are exempt, the exempt portions are to be edited and the rest released. If there are edits, each edit must be accompanied by a supporting explanation, including legal authority.

COSTS FOR OBTAINING COPIES OF PUBLIC RECORDS

Section 3. Charges for Copies and Postage

Those seeking public records will be charged only the actual cost of making copies, as follows:

Section 3.1 The charge for paper copies is 5 cents per page.

Section 3.2 There is no charge for documents e-mailed.

Section 3.3 Requestors may ask that documents be mailed to them. They will be charged the actual cost of the postage and mailing supplies.

E-MAIL AS PUBLIC RECORDS

Section 4. Definition of E-mail as Public Records

Documents in electronic mail format are records as defined by the Ohio Revised Code when their content relates to the business of the District. E-mail is to be treated in the same fashion as records in other formats and should follow the same retention schedules.

E-MAIL AS PUBLIC RECORDS

Section 4.1 Private E-mail Accounts Holding Public Records

Records in private e-mail accounts used to conduct public business are subject to disclosure, and all employees or representatives of the District are instructed to retain their e-mails that relate to public business (see Section 1 Public Records) and to copy them to their business e-mail accounts and/or to the District's records custodian.

Section 4.2 Duties of the Records Custodian in Managing Private Account E-mails

The records custodian is to treat the e-mails from private accounts as records of the public office, filing them in the appropriate way, retaining them per established schedules and making them available for inspection and copying in accordance with the Public Records Act.

FAILURE TO RESPOND TO A PUBLIC RECORDS REQUEST

Section 5. Legal and Non-Legal Consequences

A public office recognizes the legal and non-legal consequences of failure to properly respond to a public records request. In addition to the distrust in government that failure to comply may cause, failure to comply may also result in a court ordering the public office to comply with the law and to pay the requestor's attorney's fees and damages.

Revised 1/18/2024

Residential Meter Detail

ACRWD responsibility for installation, repair and maintenance

- Meter pit installed by ACRWD to be set at or as close to grade as possible

(ACRWD Responsibility)

(Customer Responsibility)

(Standard 5/8" Residential Meter)

Residential Meter Detail

Customer Responsibility for installation, repair and maintenance

- Customer installed Shut Off Valve and Dual Check Valve
- Customer **MUST** maintain access to shut off valve at all times
- ACRWD will maintain a 5' pig tail that customer connects to for service
- ACRWD will use 3/4" IPS, Class 250, polyethylene pipe
- ACRWD recommends customers to install and maintain their own Pressure Reducing Valve

(3/4" female pac-joint to 3/4" male threads, 3/4" curb stop, 2" x 3/4" brass nipple, in-line dual check valve, 3/4" male threads to 3/4" female pac-joint, will need 2 inserts for pipe)

These fittings are available at local hardware stores.
